

School of Electronics & communication Engineering

Electromania

EventID:ECET1603

TASK:

Every group will be given a couple of riddles.

Contents:

This event contains only 10 groups, each having minimum 2 students and max 3 students.

Event will be divided into 2 stages.

First stage:

Each group will be given a couple of riddles to solve. The solution of the riddles will be the output of the circuit which they have to make.

Second stage :

Ones who will solve the riddles will go to second stage only 3 groups will be there in second stage. In this, they have to design the ckt whose output will be solution of one of the riddles. This task has to be done on bread board.

Rules:

1. Every round is a timer round.
2. The completion of your task will be considered if and only if your ckt is working properly.
3. Total 10 teams will participate. Out of these only 3 teams will go in 2nd round.
