HydroMissiles

EventID:MET1605

For those who soar in high skies, who believe in giving wings to their fire within the hydro missile is your ultimate pit stop where you get a first hand experience of what it feels like being a missile man . Build a water bottle rocket partially filled with water, attached it to an air compressor and them and launch off the pad with a blast. The goal of this contest is to get the maximum range possible and go aloft in the air as long as compete to win the rocket trophy.
