

School of Computer Science WebCamp

EventID:CSET1605

An individual coding event in which participants need to design layout for given task. The event will mainly focus on the ability of the participants to test their designing skill as quick as they can. The one who design the best layout with perfect color combination in the allotted time shall be crowned the winner. The coding should be done in Html Css Bootstrap Javascript or any other web framework and finally push those code in github.
